

VI

where the substituents are defined as in claim 12.

REMARKS

The amendment is being submitted to correct the formulae in the specification and claims to provide proper basis for the structure of Formula I. The amendment does not raise new issues but corrects an inadvertent error in the formulae.

Respectfully submitted,
Bierman, Muserlian and Lucas

corresponding to a compound of Formula I of claim 1 wherein R is -
 $(CH_2)_m-OH$ and optionally subjecting the latter to an aralkylating or acylating agent to obtain a compound of Formula I of claim 1

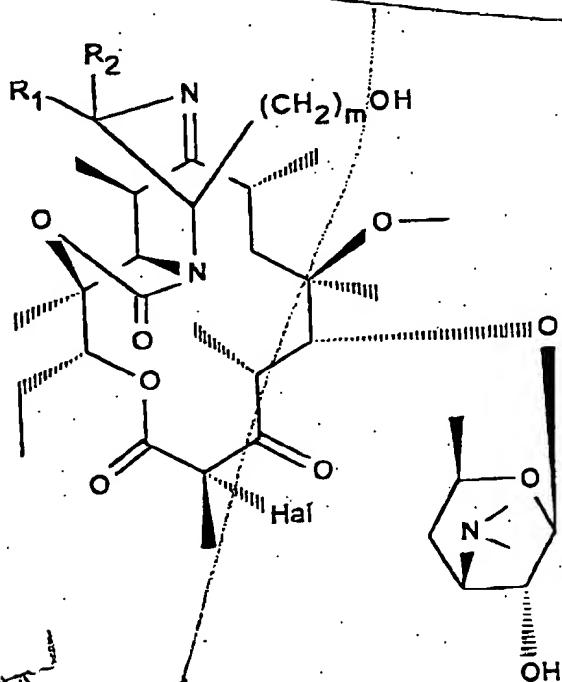

O
||wherein B is $-(\text{CH}_2)_n\text{-Ar}$ or $-\text{C}(=\text{O})\text{-Ar}$.REMARKS

Reconsideration of this application is requested in view of the amendments to the specification and claims and the remarks presented herein.

The claims in the application are claims 1 to 4 and 6 to 13, all other claims having been cancelled. It is noted that claims 6 and 13 were deemed to be drawn to allowable subject matter. The claims have now been renumbered consecutively with the specification.

Claims 1 to 4 and 7 to 12 were rejected under 35 USC 112, second paragraph as being indefinite for the reasons set out in paragraphs a to g of the office action.

Applicants respectfully traverse these grounds of rejection since the amended claims are believed to comply with 35 USC 112. With respect to objection a, the definition of b has been corrected to insert an "OR" at the appropriate place. Claim 7 has been amended to insert the appropriate parenthesis and to correct the typographical error with respect to the hydroxymethyl substituent which should have been "18-hydroxymethyl substituent" and not "17" as can be seen from Example 2. Claims 10 and 11 have been amended

corresponding to a core for halogenated compounds

wherein R is $-(CH_2)_m-OH$ and optionally subjecting the latter to an aralkylating or acylating agent to obtain a compound of claim 1

15

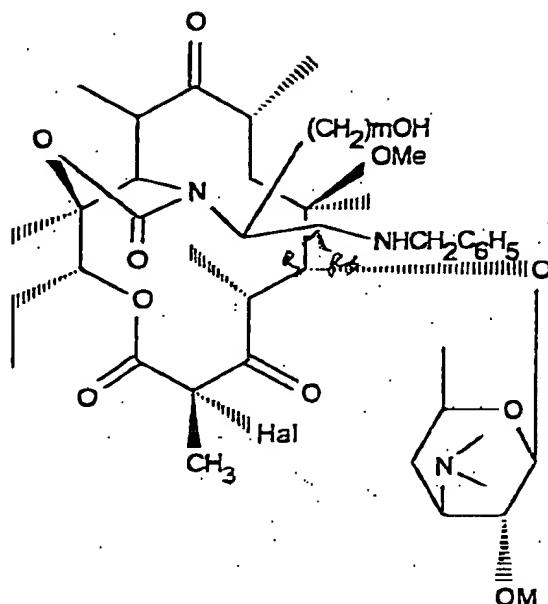

wherein B is $(CH_2)_n-Ar$ or $-C(=O)-Ar$.

13. A compound selected from the group consisting of
